

ISO 45001:2018 - Certified Lead Auditor

Introduction

The ISO 45001:2018 - Certified Lead Auditor certification course is designed by the GAQM for individuals who are involved in auditing their organization's Occupational Health & Safety Management System (OHSMS) or individuals who want to become a health & safety consultant. This training program enables the candidate to acquire the knowledge and skills required to perform first, second and third-party audits of OHMS against ISO 45001, in accordance with ISO 19011 and ISO/IEC 17021. Moreover, the certification successfully validates the abilities of the candidate to execute processes involved in establishing, implementing, operating, monitoring, measuring, analyzing, evaluating, reviewing, maintaining, and improving an OHSMS

Course Highlights

The core aspects of the ISO 45001:2018 - Certified Lead Auditor credential is the following:

- Purpose and benefits of an OHSMS
- plan, conduct, report, and follow-up an audit of an occupational health and safety management system
- Generating audit findings
- Terms and definitions used in ISO 45001
- Requirements for OHSMS documented information and the difference between maintaining and retaining documented information
- Purpose and differences of first, second, and third-party audits
- Role of the auditor
