

Certified Agile Scrum Product Owner (CASPO)

Introduction

The Certified Agile Scrum Product Owner (CASPO) certification course is intended for individuals who want to learn about different ways to improve their product value by speeding the development phase of the product delivery. The CASPO certification provides the right knowledge and expertise to use the Scrum product backlog as a tool for the project's success. As a Certified Agile Scrum Product Owner (CASPO), the candidate will also monitor the product development phase, iteration after iteration, and hence, the candidate will be able to know how to respond to changes in business conditions by restructuring the product backlog. Therefore, this certification ensures that the student successfully gains the ability to manage their time efficiently and maximize the workflow and project ROI by using different strategies.
