

# ISO/IEC 27031:2011 - Lead Implementer

## Introduction

The ISO/IEC 27031: 2011 - Lead Implementer certification course is developed by the GAQM for individuals who want to get guidance on the concepts and principles behind the role of information and communications technology (ICT) in ensuring business continuity. The ISO/IEC 27031:2011 credential helps the learners to identify the core aspects including performance criteria, design, and implementation details. Moreover, the certification improves ICT readiness as part of the organization's ISMS, and therefore, helps to ensure business continuity, security, and incident handling and management.

## Course Highlights

The core aspects of the ISO/IEC 27031: 2011 - Lead Implementer Certification are as follows:

- The role of IRBC in BCM
- Plan, Do, Check and Act
- Management Responsibility
- IRBC Internal Audit
- ICT Readiness Performance Criteria
- Continual Improvement
- Incident Response
- Awareness, Competency and training Program
