

Professional Product Owner (PSPO)

Introduction

Being a professional Product Owner encompasses more than writing requirements or managing a Product Backlog. Product Owners need to have a concrete understanding of all product management aspects, including but not limited to product ownership, that drives value from their products.

The Professional Scrum Product Owner course focuses on all of these areas to teach students how to maximize the value of software products and systems. PSPO is the cutting-edge course for Product Owners, Agile product managers, and anyone responsible for a software product's success in the market. In this course, students will develop and solidify their knowledge of being a Product Owner through instruction and team-based exercises.

The breadth of the role's responsibilities in delivering a successful product will become more clear from an Agile perspective. Metrics are identified to track the creation of value and the successful delivery of the product to the marketplace.

The PSPO course is much more than just a set of slides and an instructor. In this course, students work on real-life cases with other classmates together as a team. This course is made up of discussions and hands-on exercises based upon real-life cases.

Learning Objective

- Students are challenged to think in terms of Scrum and the Scrum principles to better understand what to do when they return to their workplaces and their specific challenges.
- Students will have a clear understanding of the mechanics of Scrum and how the Product Owner role fits in.
- Students can act as Product Owners for Scrum Teams and stakeholders.
- Students can effectively increase the business agility of their organization.

About PSPO I

The Professional Scrum Product Owner level I (PSPO I) is intended for anyone who wants to validate their knowledge of the Scrum framework and ability to support value creation and delivery. Besides this, PSPO I certified holders prove that they understand the Product Role and have proficiency in applying Scrum in Scrum Teams. Therefore, those who pass the PSPO I assessment will successfully receive the industry-recognized PSPO I certification to demonstrate their mastery of the content.

PSPO I Modules

The PSPO I assessment includes questions from the following focus areas;

- **Understanding and Applying the Scrum Framework:**
 - Empiricism, Scrum Team, Events, Artifacts, Done.
- **Developing People and Teams:**
 - Self-Managing Teams.

- **Managing Products with Agility:**
 - Forecasting & Release Planning, Product Vision, Product Value, Product Backlog Management, Business Strategy, Stakeholders & Customers.

PSPO I Pre-requisites

There are no formal prerequisites required for taking the PSPO I certification course.

About PSPO II

The PSPO II training course is intended for individuals who want to validate their advanced-level knowledge of Professional Scrum Product Ownership, the Scrum framework, and delivering valuable products. Besides this, PSPO II certified holders prove that they have an understanding of the underlying principles of the roles of Product Owner and they can effectively apply Scrum in complex or real-world situations. Therefore, those who pass this assessment will successfully receive the industry-recognized PSPO II certification as an indication of their advanced knowledge and abilities of the role of Scrum Product Owner or Master.

PSPO II Modules

The PSPO II assessment includes questions from the following focus areas. Since this is an advanced level Product Owner assessment the greatest emphasis will be on focus areas listed under Managing Products with Agility followed by focus areas from Evolving the Agile Organization.

- **Understanding and Applying the Scrum Framework:**
 - Empiricism, Scrum Values, Scrum Team, Events, Artifacts, Scaling.
