ISO 27001 ISMS - Certified Internal Auditor

Introduction

The ISO 27001 ISMS - Certified Internal Auditor certification course is designed by the Global Association for Quality Management (GAQM), to fulfill the necessity of establishing an Information Security System (ISMS) in an organization. It enables the candidates to identify any risks that pose a threat to the effectiveness of an organization (ISMS). The certification is aimed at delivering both - technical knowledge and practical skills to become a skilled internal auditor. Therefore, after successful completion of the ISO 27001 ISMS certification course, the candidates are well-qualified to plan, conduct, and report ISMS audits.

Course Highlights

The core aspects of the ISO 27001 ISMS - Certified Internal Auditor credential are the following:

- Standards and regulatory frameworks
- Fundamental principles of Information Security Management Systems.
- Information Security Management Systems
