PRINCE2
Practitioner

Introduction

The PRINCE2 Practitioner qualification is intended for project managers and aspiring project managers. It is also relevant to other key staff involved in the design, development, and delivery of projects, including project board members (e.g. senior responsible owners), team managers (e.g. product delivery managers), project assurance (e.g. business change analysts), project support (e.g. Project and Programme Office personnel), and operational line managers/staff.

The PRINCE2 Practitioner examination is intended to assess whether a candidate can apply and tailor the PRINCE2 project management method (as described in the syllabus below). A successful Practitioner candidate should, with suitable direction, be able to start applying the method to a real project but may not be sufficiently skilled to do this appropriately for all situations. Their individual project management expertise, the complexity of the project, and the support provided for the use of PRINCE2 in their work environment will all be factors that impact what the Practitioner can achieve.

Course Objective

- Apply the seven principles, processes, and themes in the PRINCE2 guidelines
- Learn how to tailor your approach for different projects, ensuring flexibility and success in today's dynamic work environment
- Develop a product-based planning approach for projects that helps divide them into manageable, controllable stages
- Control the use of resources and effectively manage project risk
- Understand the roles and responsibilities of each member of the team tasked with managing a project
- Apply skills that complete and complement the knowledge-based approach of the PRINCE2 certification
