Professional Scrum with Kanban (PSK)

Introduction

The Professional Scrum with Kanban (PSK) course teaches Scrum practitioners how to apply Kanban practices to their work. Through theory, case studies, and hands-on exercises, participants will understand the importance of transparency and flow as it pertains to the Scrum framework. Scrum is the defacto standard for how Agile teams work. Scrum exists only in its entirety and functions well as a container for other techniques, methodologies, and practices. Scrum Teams keep improving how they work, based on what they learn by inspecting and adapting on an ongoing basis.

In this class, students will learn how Scrum Teams can introduce additional practices from Kanban while continuing the way they are already working today with Scrum, all without changing Scrum.

Learning Objective

Students will learn how their Scrum Teams can introduce complementary practices from Kanban while continuing the way they are already working with Scrum, all without changing Scrum. In this class, students will;

- Gain a clear understanding of how the flow works within the context of Scrum.

- Be introduced to Kanban practices that Scrum Teams can adopt to help improve their effectiveness and efficiency.

- Understand how to effectively use the appropriate Kanban practices without changing Scrum.

- Learn a practical approach to improving transparency and visibility for their work.

Course Outline

Module 1: Dispelling Common Myths
Module 2: Understanding Professional Scrum
Module 3: Kanban Theory, Principles and Practices
Module 4: Kanban in Practice
Module 5: Scrum with Kanban

Pre-requisites

There are no prerequisites required for taking the Professional Scrum with Kanban certification course.
